Re: Tremco™ Gutter Seal™ – LEED™ Product Information

"LEED" is a trademark of the
U.S. Green Building Council

To Whom It May Concern:

Tremco, as an organization, is committed to quality, responsive to internal and external customers, our employees, our community and environment, and we will treat all with respect and good stewardship.

Gutterseal is made in Toronto, Ontario. Should your job site be within 500 straight-line miles of ATorontod, this material will help contribute positively towards the Locally Manufactured Material Credit.

No single extracted material is used to produce the majority of this product. Additionally, all raw materials come from one of several sources which in-turn come from one of several raw material feed stocks. As such, point source for the raw materials cannot be determined.

The recycled content by weight is as follows:

30 ctgs (1 case)	0.06% (all post-consumer)
60 ctg cases (1 pallet)	1.64% (.06% p.c., 1.58% post-industrial)

Gutter Seal Sealant contains 240g/L volatile organic content (VOC).

Should you have any questions or require additional information, please do not hesitate to contact Technical Services.

Sincerely,

A handwritten signature in dark ink, appearing to read "Michael Schmeida", with a long horizontal stroke extending to the right.
