

## Tungsten Carbide drills

FOR USE IN:

**GLASS,  
PORCELAIN,  
TILE AND  
MIRRORS.**

- Quick-change 1/4" (6.3 mm) Hex shank.
- Hex shank prevents the drill bit from slipping in the drill chuck.
- For drilling kitchen or bathroom ceramic tiles, porcelain, mirrors, un-toughened glass and ceramic pots.
- Hard precision ground Carbide for longer tool life.
- Pointed chisel edge, facilitates precise starting and prevents the drill bit from "walking"
- Spear point design reduces cutting pressure and reduces the risk of tile chipping.

- 
- ▶ For best results, apply water for cooling.
  - ▶ Use low RPM, turn off hammer action if using with an impact or percussion drill.
  - ▶ If the tile is on the wall, use a masonry bit to finish the hole once through the tile.

Code	Diameter
D015028	3/16
D015084	1/4
